

The Importance of Physics to the Economies of Europe

📅 28-11-2025 🔗 <http://www.primapagina.sif.it/article/2095>

The European Physical Society (EPS) and the Centre for Economic and Business Research (Cebr) have released the third edition of the report "The Importance of Physics to the Economies of Europe". An update to the previous version released in 2019, this report covers the years 2016-2022 and details the impact of physics-based businesses on the economy of the EU member states, three EFTA countries and the UK.
