

TECHNICIAN

Requirements:

Education:	Electronics - Mechatronics
Experience:	without experience (for training) or max 5 years
Language:	English (Level good)
Driving licence:	B
IT skills:	Office, CAD 3D programs (Solidworks and/or Inventor) For electrical drawings
Other:	Available to travel

Tasks:

1. Managing projects by coordinating activities and resources (suppliers, third parties, logistics, final customer, ...)
2. After sales activities for training of customer operators and technical assistance on site and in site (for the first year, mentorship by our qualified technicians)
3. Back office activities for issuing sale offers (with the aid of SAP B1 and Microsoft Office 365)
4. Technical and sales front office activities (for the first year, mentorship by our qualified technicians)
5. Interfacing of electromechanical components, such as motors and subassemblies of PLC controls or by means of analogic or digital signals.

An asset will be the experience in the use of CAD 3D project software for the creation of electrical drawings developed by us and, if it is the case, the creation of simple components for mechanical and electrical/electrotechnical interfacing (with Solidworks and/or Inventor)
