

TRADES

The game "Trades" is described in the Dynamic Physical Education for Elementary School Children text by Dr. Robert Pangrazi.

The graphic on the following page is to be used for the back side ("backs") of the Trades game cards.

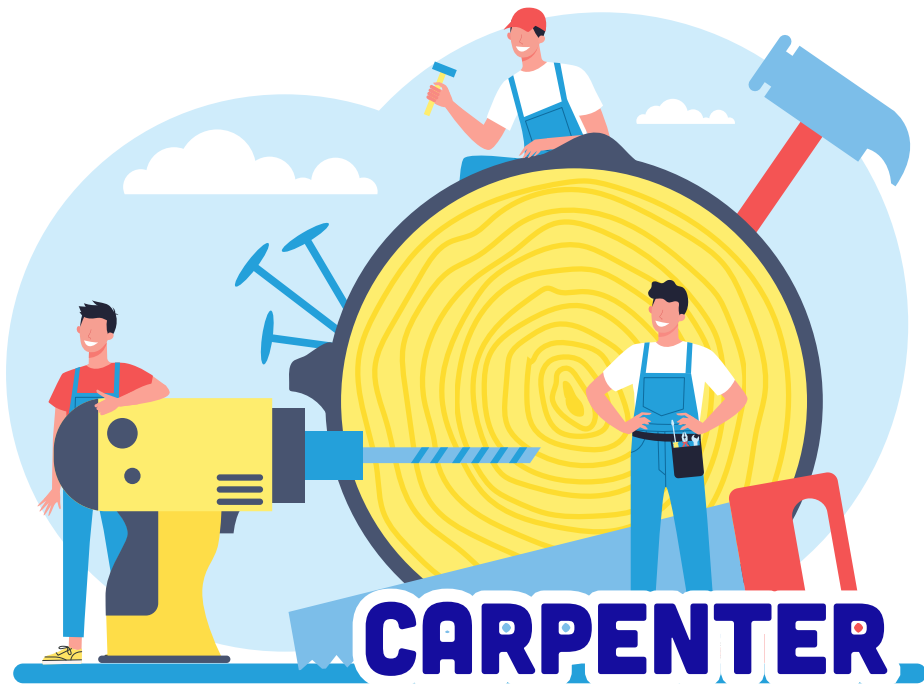

To create more durable cards, use card stock rather than paper and laminate the cards before cutting them into fourths.

Copy the "backs" of the Trades game cards first. Then, turn the copies over and run the set of "trades" pictures on the reverse side of the card stock.

You will need to print 7 copies of the "backs" to make a complete set of Trades game cards.
