ABOUT

The Group Training Academy is the training arm of the Automotive Parts Services Group. Federated Auto Parts and The Pronto Network merged their efforts and resources in a number of key areas to form the Automotive Parts Services Group or simply, The Group. The goal of The Group is a solid focus on "best in class" in order to provide overall value and support within the auto care industry, build upon the success, cultures and relationships of The Pronto Network and Federated, and work together for a stronger future.

The Group Training Academy is powered by AVI.

Automotive Video Innovations (AVI) was founded in 1994. AVI is an ASE Accredited Training Provider for the automotive industry. The mission of AVI is to produce automotive repair training courses and information for the automotive aftermarket, providing current and future repair technicians with the highest level of technical training available.

AVI produces automotive technician training for online On Demand, instructor-led courses, technical training manuals and other media, with a commitment to continually update this training to stay in-step with the evolution of automotive technology.

The newest brand under the AVI umbrella is AVI On-Site. Focused on providing expert-led, hands-on training at the customers location. We come to your shop, teach your techs, and provide access to cutting edge training aids, techniques, and technology.

Presently our offerings consist of 1,000+ hours of online training content, ASE Master Certified instructors for live, on-site, and virtual training, and a robust offering of training aids for educators.

The Group Training Academy is an online training platform that is designed for professional technicians, shop owners, and managers. From rookie techs to master mechanics, The Group Training Academy offers a wide selection of online courses designed for all levels of experience and ability. Current course topics include ASE Test Prep, Diagnostics, Diesel, Hybrid, Management, and Tools & Equipment. The Group Training Academy courses are available 24/7, so you have the flexibility to go at your own pace and take courses whenever it's convenient for you.

LEARNING MANAGEMENT SYSTEM

AVI has created a robust, custom Learning Management System (LMS) with attention paid to every aspect of the learning process. Typical courses offer a pre-test, course content, a post-test, and a certificate upon successful completion. Much of the content is video driven and learners can pick up where they left off anytime, any day with our On Demand service.

AVI ON DEMAND

EXPERT TRAINING FOR THE AUTOMOTIVE PROFESSIONAL

With both the Group Training Academy and AVI On Demand the content is center stage and is supported by a number of features and functions. Shops and organizations will be able to manage their learners in a number of ways.

Shops and Educators Can:

- Assign Courses
- Set Due Dates
- Track Student Progress
- Set Individual Learning Paths

LMS Features:

- Download Reports
- Pre- and Post-Tests
- Print & Download Certificates
- Add and Track NATEF CE Credits

Monthly Premium Course Releases
Our Concierge Service is Available to Help Manage Your Learners

ALL ACCESS PASSES

The All Access Pass is precisely as the name implies, a pass that grants access to all AVI content, featuring over 500 hours of expert instructor led content. The All Access Pass does not include 3rd party content from providers such as ATSG, ATRA, Bosch and others.

The All Access Pass is available through a monthly or yearly subscription. For a dedicated automotive aftermarket technician, counterman, or service advisor this pass will grant the greatest bang for the buck.

For Educators, AVI offers the Unlimited Educator pass. Granting an unlimited amount of seats, this yearly subscription will reinforce your curriculum. This pass is only good for one location.

Shop Owners/Managers and Educators can assign courses and monitor student progress. Students can watch courses, take and re-take tests as often as they like, print certificates of completion and create a resume-like portfolio to take with them when they graduate.

Approved for NATEF/ASE Education Foundation CE Credits.

AVI is an ASE Accredited training provider.

<u>SKU</u>	<u>Product</u>	<u>Description</u>
ALL-ACCESS	All Access Pass	All Access Pass for all content except third party content. Available in Monthly or Yearly terms. Shops are granted 5 free user profiles upon registration. Additional fee applies to extra seats.
UNL-EDU-PASS	Unlimited Educator Pass	For Educators, this pass grants the same All Access level of content with an UNLIMITED number of seats. One location per pass. This is a yearly subscription.

ASE TEST PREP PROGRAMS

AVI offers an extensive library of ASE Test Prep courses. As an ASE Accredited Training Provider you can trust that AVI's courses will help you earn that next certification.

COMING SOON: ASE X-1 Undercar Specialist Exhaust Systems

Featuring Exhaust system inspection, diagnosis, repair, installation, fabrication, and regulations. This course also covers catalytic converter operation, diagnosis, and repair. Stay tuned for more information!

<u>SKU</u>	<u>Course</u>	<u>Description</u>
ASE-A1-AVIOD	ASE A-1 Test Prep	ASE A-1 General Engine Diagnostics and Repair
ASE-A2-AVIOD	ASE A-2 Test Prep	ASE A-2 General Transmission Diagnosis
ASE-A3-AVIOD	ASE A-3 Test Prep	ASE A-3 Manual Drivetrains and Axles
ASE-A4-AVIOD	ASE A-4 Test Prep	ASE A-4 Suspension and Steering
ASE-A5-AVIOD	ASE A-5 Test Prep	ASE A-5 Brakes
ASE-A6-AVIOD	ASE A-6 Test Prep	ASE A-6 Electrical and Electronic Systems
ASE-A7-AVIOD	ASE A-7 Test Prep	ASE A-7 Heating and Air Conditioning
ASE-A8-AVIOD	ASE A-8 Test Prep	ASE A-8 Engine Performance
ASE-A9-AVIOD	ASE A-9 Test Prep	ASE A-9 Light Vehicle Diesel Engines
ASE-C1-AVIOD	ASE C-1 Test Prep	ASE C-1 Automobile Service Consultant
ASE-F1-AVIOD	ASE F-1 Test Prep	ASE F-1 Light Vehicle Compressed Natural Gas

Accredited Training Provider

<u>SKU</u>	<u>Course</u>	<u>Description</u>
ASE-G1-AVIOD	ASE G-1 Test Prep	ASE G-1 Auto Maintenance and Light Repair
ASE-L1-AVIOD	ASE L-1 Test Prep	ASE L-1 Advanced Engine Performance Specialist with Type 4 Composite Vehicle
ASE-L2-AVIOD	ASE L-2 Test Prep	ASE L-2 Medium/Heavy Vehicle Electronic Diesel Engine Specialist
ASE-L3-AVIOD	ASE L-3 Test Prep	ASE L-3 Hybrid/Electric Vehicle Specialist
ASE-P2-AVIOD	ASE P-2 Test Prep	ASE P-2 Automotive Parts Specialist
ASE-T1-AVIOD	ASE T-1 Test Prep	ASE T-1 Gasoline Engines
ASE-T2-AVIOD	ASE T-2 Test Prep	ASE T-2 Diesel Engines
ASE-T3-AVIOD	ASE T-3 Test Prep	ASE T-3 Drivetrain
ASE-T4-AVIOD	ASE T-4 Test Prep	ASE T-4 Medium/Heavy Duty Brakes

ASE-T6-AVIOD	ASE T-6 Test Prep	ASE T-6 Medium/Heavy Duty Electrical and Electronic Systems
ASE-T7-AVIOD	ASE T-7 Test Prep	ASE T-7 Medium/Heavy Truck Service Heating and Air Conditioning
ASE-T8-AVIOD	ASE T-8 Test Prep	ASE T-8 Medium/Heavy Preventive Maintenance Inspection (PMI)

HYBRID & ELECTRIC VEHICLES

COMING SOON: HYBRID/EV SCAN TOOL DIAGNOSTICS

LBT-448: This course teaches the multiple configurations of HEV/EV systems to build a diagnostic strategy using your Scan tool. You will have a better understanding of system controls and monitoring.

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LBT-408	Introduction to Electricity	AVI is pleased to announce our new basic electricity course. This is part one of our three-part series covering an all-inclusive start to finish course on electricity.
LBT-422	High Voltage Component Strategies	The course covers the components that make Hybrid/EVs unique and delves deep into their operation, their specialized components and effective diagnostic procedures.
LBT-436	3 Phase Inverters	In this course, instructor Dave Hobbs will discuss 3 Phase AC inverters, along with the role DC to DC converters play in the 3 Phase process
LBT-442	Electric Vehicle Theory and Operation	AVI instructor Tom Rayk covers theory, operation, and essential diagnostic concepts anyone working on hybrid or full electric vehicles must know.
LBT-444	Brake Technology	Tom Rayk covers the latest brake advancements, including electronic braking along with hybrid and electric vehicle brake service information.

DIESEL ENGINES

Diesel engines drive many of the critical aspects of our economy and supply chain. Get your techs trained right with AVI's extensive diesel course offerings.

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LBT-425	Talking Trucks - 6.7 Power Stroke Engine Disassembly	This hands-on course with AVI instructor Tom Rayk covers the disassembly of the 6.7, along with some of the wear and tear issues to look for.
LBT-427	Duramax L5P	This program will take you through the diagnostic procedures and component testing techniques of the low and high pressure fuel system and air induction system along with revised emission components to keep you up to date with this powerful GM diesel engine.
LBT-428	LB7 Fuel Systems & Components: Major Changes Through the Years	AVI Instructor Tom Rayk goes through servicing the low and high pressure fuel system, air induction system along with revised emission components plus much more.
LBT-429	LM2 Duramax 3.0	This program will take you through the diagnostic procedures and component testing technique and more to keep you up to date with GM's latest diesel engine.
LBT-437	Diesel Scope Diagnostics	This hands-on course with AVI instructor Tom Rayk covers several popular scopes and new methods for technicians to quickly diagnose diesel issues.

BRAKES

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LBT-438	Air Brakes	Instructor John Barclay explores the components in an air brake system. Training on components such as wheel speed sensors and tone wheels as well as the circuits involved in transmitting that data to the controller. The importance of proper adjustments and service will be stressed. Controller diagnostics including no communication faults as well as knowing how to properly evaluate controller power supplies are adequate will be addressed.
LBT-444	Brake Technology	Tom Rayk covers the latest brake advancements, including electronic braking along with hybrid and electric vehicle brake service information. Several case studies are covered, including a customer complaint of a Chevy Volt steering issue during regenerative braking. Additional topics include various brake bleeding methods, stability control, ABS, brake related ADAS components and a section on Mustang Mach E brake service information and more. Technicians will definitely be better prepared to work on modern braking systems after watching Brake Technology.

BRAKE COURSES AND AVI'S BRAKE TRAINING AIDS

The Brake Cube

Get the most out of your training by combining AVI's On Demand courses with a Brake Cube Training Aid. Students will be able to get a close look at all the components with this hands-on training aid!

See Page 15

DIAGNOSTICS & DRIVEABILITY

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LBT-440	Intro to Scope Usage Featuring LAUNCH X-431 Throttle III	This course will demonstrate basic Launch scope operation to the new user, including the set up of the Launch scope box coupled with the X431 Throttle III scan tool package. Basic lab scope terminology, scope settings, zoom features, trigger settings, lead selection and more will be covered. Several scope accessories will also be covered.
LBT-443	In-Cylinder Pressure Diagnostics	AVI Instructor John Barclay takes a deep look at pressure transducer waveforms, determining cam timing. and how to use pressure transducers to determine engine mechanical, fuel system, and misfire concerns. Valve train including intake and exhaust issues can all be diagnosed using a pressure transducer and a labscope. This class shows detailed interpretation of wave forms and timing.
LBT-447	Misfire Diagnostic Strategies	AVI instructor Andy Tirado takes you through a hands-on vehicle based case study on how to diagnose a misfire. Using various tools and technology including scopes, scan tools and mode 6, Andy will give you the road map of the techniques to quickly isolate a misfire. This course teaches a fast, efficient way to identify the type of misfire and the best way to fix it right the first time.

LAUNCH: X-431 THROTTLE III

X-431 Throttle III is Wi-Fi enabled and advanced scan tool with an upgraded all-in-one Smartlink VCI. ADAS calibration, Truck diagnosis, Remote diagnostic, OE-level vehicle diagnosis, IMMO functions, and more.

SKU: 301190720

ON-SITE TRAINING

AVI's latest brand is AVI On-Site which provides live, in-person, expert training for a wide array of courses and topics. On-Site training encompasses classroom, instructor-led demonstration, and hands-on training depending on the course, time limitations, and number of students.

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LT-HYB2-3HR	Hybrid Service & Maintenance Opportunities for Shop Owners & Service Advisors	This On-Site Course is 2-3 Hours long and is designed to showcase the various service and maintenance opportunities on hybrid and electric vehicles.
LT-HYB4HR	Hybrid Service & Maintenance Opportunities	This On-Site Course is 4 Hours long and is designed to showcase the various service and maintenance opportunities on hybrid and electric vehicles. Course will also cover safety requirements and specialty tool needs.
LT-HYB6-8HR	Hybrid/EV Technology & Maintenance Opportunities	This On-Site Course is 6 to 8 Hours long and will cover safety and personal protective equipment as well as specialty tools required to safely and accurately diagnose hybrid and EV systems
LT-HYB16HR	Hybrid/EV Technology & Maintenance Opportunities Comprehensive	This On-Site Course is 16 Hours long and will cover all aspects of hybrid and electric vehicle maintenance opportunities. The first 4 hours is perfect for service advisors and the rest is aimed at technicians.

AVI recieved the prestigious 2022 ASE Training Managers Council (ATMC) Award for our Hybrid EV Technologies Program, a comprehensive blend of On Demand and On-Site training. The award was presented to AVI at AAPEX in Las Vegas.

HEAVY DUTY TRUCK AIR BRAKE WORKSHOP - 3 DAYS - HANDS-ON

This On-Site hands-on class will engage the attendees with a working knowledge of how Air Brake components function. We take three days to cover key systems, components and strategies to help you and your team make quality repairs. The class will assemble an air brake system, plumb it and make it work. Please bring your safety glasses this will be a hands on type class. System diagnostics will be covered using the working system assembled by the class using actual Air Brake components. Adjustments and disc air systems will be covered. An ABS module will also be used for diagnostics and service.

SKU: LT-HD-AIRBRK

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LT-DURAMAX-6-6L5D	International Duramax 6.6 L5D	This On-Site Course covers Essential training taught by certified AVI instructors, the curricula to be presented includes an Introduction to new Duramax systems. Additionally, the course covers safety, diagnostics, major components vehicle configurations, Diesel emission technologies, and more.
LT-EL-ELEC-8HR	Entry Level Electrical	This On-Site Course is 8 hours long and will provide the entry level teammates with the core skills that will allow them to develop into a skilled A level technician in the future. Practical hands-on training will be performed by the teammate on electrical testing training aids.
LT-INT-ELEC-16HR	Intermediate Level Electrical	This On-Site Course is 16 Hours long and will provide knowledge and comprehensive testing of Battery, starting, charging and complete vehicle electrical systems. All needed electrical skills will be combined and practiced on training boards that simulate practical testing of all electrical systems under the hood. Custom hands-on training aids will be used.

ON-SITE TRAINING

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LT-LABSCP-8HR	Lab Scope Usage	This On-Site Course is 8 Hours long and is hands-on, you will learn how to set your scope to capture the signals you will use to diagnose faults in today's cars. From gathering preliminary baseline signals to deep diagnostics with pressure waveform we will teach you the processes require to be successful with your scope.
LT-BRK-SERV-16HR	Brake System Service	This On-Site Course is 16 Hours Long and includes visual inspection, complete hydraulic system theory and operation, disc and drum brake system service and repair, resurfacing of rotors and drums using bench and on-car lathes, service and parking brake system adjustment and diagnostics, brake line repair and flaring of brake lines. We will provide the Brake Cube training system mock-ups for use in the classroom.
LT-ADV-BRK-8HR	Advanced Brakes & Stability	This On-Site Course is 8 Hours long and will cover anti-lock braking, traction control, and stability systems which work together to give advanced driver assist systems (ADAS). Component level identification and testing will be covered including operational characteristics of individual ABS and ADAS designs
LT-SSPTECH-16HR	Suspension System Technology	This On-Site Course is 16 Hours long. Using our custom mock-ups, the technicians will be able to perform most typical suspension system repairs and adjustments in a classroom environment. This course is intended for techs who have some knowledge but limited experience

<u>SKU</u>	<u>Course</u>	<u>Description</u>
LT-AIRCON-16HR	Air Conditioning Service	This On-Site Course is 16 Hours long and will cover all aspects of modern air conditioning systems using both R134 and R1234yf refrigerants. The complete refrigeration cycle will be explained, and all components involved will be discussed in detail. Service and testing techniques along with equipment usage will be covered. Proper system leak testing tools and procedures will be shown and fully discussed.
LT-HYB-AC-8HR	Hybrid & Electric Vehicle Air Conditioning Service	This On-Site Course is 8 Hours Long and will cover the design, operation, and testing of A/C systems on hybrid and electric vehicles. These systems can come in many forms of compressor drive from belt only, belt/electric combination to full electric in either AC or DC voltage supply. A condensed discussion of the refrigeration cycle will be included.

COMING SOON: EXPANDED HEAVY DUTY COURSE OFFERINGS

AVI is aggressively expanding our On-Site Heavy Duty offerings. The following topics are in development now and should be available sometime in 2023:

- HD Air Brake & Electrical Workshops
- Heavy Duty EV Safety
- Diesel Fuel Testing
- Emissions and Aftertreatment Systems
- Cummins 6.7 - L9 - X15 Engines / Driveability
- Cummins INSITE™ Scanner Diagnostics
- International CV Engine / Driveability
- International Diamond Logic®
- Navistar® Engine Diagnostics (NEDS)

TRAINING AIDS

AWARD WINNING ELECTRIC VEHICLE TRAINING AID

AVI has won a 2022 Motor Top 20 Award for EVA: the Electric Vehicle Training Aid. From the company that brought you the award-winning cutaway hybrid vehicle, we are proud to unveil a totally self-contained, turn-key EV system trainer.

It was specifically designed to teach the fundamentals of high voltage electric vehicle diagnostics in a safe, controlled environment.

EVa: The Electric Vehicle Training Aid - **NEW! 2nd Generation**

SKU: EVA-1

There are many advantages to using a compact training tool when space is an issue. With EVA, there is no need for an entire vehicle! There will be no obstructing parts or covers so you can access the area you need for testing, diagnosing and problem solving. Hands-on made easy!

THIS TRAINING AID INCLUDES:

- *NMH Battery Pack for safety*
- *Reversible 3 Phase Motor*
- *Traction Inverter*
- *C.A.N. Software*
- *Charging controller*
- *Regenerative Braking*
- *Liquid Coolant System*
- *Built-in Faults & Student Worksheets*

EVA comes with a year subscription of curriculum. It includes slide deck with instructor notes, videos, worksheets, test questions and answers.

Hybrid Electric Cutaway Vehicle Trainer

SKU: CUTAWAY-1

AVI's Hybrid Electric Cutaway Vehicle Trainer is a fully operational vehicle developed for static and active training scenarios. There are secondary, de-energized high voltage components such as an additional battery, inverter, and motor generator for introductory practical exercises.

TRAINING COMPONENTS

- Electricity Fundamentals
- EV / Hybrid Safety
- HV Battery Technologies
- Regenerative Braking
- EV Cooling Systems
- Remote-control Faults with Student Worksheets

AWARD WINNING HYBRID ELECTRIC CUTAWAY TRAINER

AVI won the 2021 PTEN Innovation Award for the Hybrid Electric Cutaway Vehicle Trainer.

TRAINING AIDS

Brake Cube: Self-Contained Brakes Training Aid

SKU: BRK-CUBE

With this compact, customizable training aid, an instructor doesn't need to put a car on the lift to demonstrate automotive brake system operations or repairs.

No need to remove wheels/tires. Everything is out in the open, easy for all to see.

One of the best features of the Cube is the instructor's ability to interchange the Cube's components to suit each classes individual needs.

Student's will learn the principles of ABS, proper master cylinder and brake line bleeding procedures, as well as all the functions of a modern automotive braking system.

The training aid comes with a year subscription of curriculum. It includes slide deck with instructor notes, videos, worksheets, test questions and answers.

BRAKE CUBE APPEARS IN ASE TEST PREP COURSE

AVI Instructor Vince Manship uses the Brake Cube in the latest version of the ASE A-5 Automotive/Light Truck Brakes Test Prep Program.

TRAINING AIDS FOR EDUCATORS

ATS Tools eTrainer Jr. Educator's Kit

SKU: ETRAINER-JR-KIT

The ATS Tools: eTRAINER JR hands-on training simulator will cover the operation and testing of basic to advanced electronic circuits. This training program provides the student with a complete step-by-step course that will enable the student to understand what the voltage measuring instrument is conveying to the technician.

Kit Includes:

- Complete electrical training program includes series, electrical circuits, worksheets, & more
- 10 eTRAINER JR's
- 10 Fault Block Kits
- 10 Power Supplies
- 1 eTRAINER JR Manual
- Custom Pelican Air Carry Case with retractable extension handle and quiet rolling stainless-steel bearing wheels

Training Functions Available:

- Series Circuit Testing
- Parallel Circuit Testing
- Series-Parallel Circuit Testing
- Lamp Circuit
- Motor Relay Circuit
- Throttle position Sensor Circuit
- Engine Coolant Sensor Circuit
- Crankshaft Position Sensor Circuit
- Camshaft Position Sensor Circuit
- Fuel Injector Circuit
- Ignition Coil Circuit
- Oxygen Sensor Circuit
- Crankshaft to Camshaft (Crank Angle Space) Circuit
- Front O2 to Rear O2 Catalytic Converter Testing

TRAINING AIDS FOR EDUCATORS

EV Motor & Generator Stem Kit - 10 Sets of Components

SKU: STEM-01

TURN YOUR CLASSROOM INTO A STEM LABORATORY!

This kit provides the foundation of hybrid and electric vehicle technology with ten sets of parts that can be configured a variety of ways to create an electric motor or generator.

Students will discover how electricity drives the motor with battery power and also how such a motor might generate electricity when used in reverse.

Kits come with student worksheets listing the activities and challenges that will demonstrate the principles of magnetism, electric generators, and gear reduction.

This hands-on experience will reveal the spark that drives our digital lives.

With electricity driving most of our lives, not to mention some of our cars, the EV Motor and Generator STEM Activity Kit can provide days of valuable education for students of all ages!

The kit includes a sturdy case for all components.

SCAN THIS QR CODE TO BUY YOUR EV MOTOR AND GENERATOR STEM ACTIVITY KIT TODAY

AVI TOOLS & EQUIPMENT

<u>SKU</u>	<u>Product</u>	<u>Description</u>
HVBATCON-AVIOD	High Voltage Battery Contactors Training Module	Used to teach HV power up and how the Pre-Charge resistor and contactors work. Can be used to facilitate circuit operation and using wiring diagrams. Students can assemble and operate the system as it works in a live EV. This training module acts as a real EV circuit however uses low voltage to provide educational safety during the learning process.
ADASCAM-AVIOD	Backup / ADAS Camera Tester	Use this tester to diagnose the video out channels of both back up cameras and ADAS calibration cameras. Unit is all inclusive with various camera leads and a built in 5-volt and 12-volt power supply to power up the cameras.
HVBT-AVIOD	High Voltage Battery Cell Load Tester	Use this tester to diagnose the individual battery cells of a high voltage battery pack. Use your scan tool for direction on suspicious battery modules, then simply dynamically load test the various cells to see if they can be charged or will need to be replaced to properly balance the H.V. battery pack and eliminate those pesky DTC's.
RCT-AVIOD	Relay Circuit Tester	This tool solves the problematic concern of never having the right relay circuit testing tool in your expensive tool truck kits. By having just two small spade terminals as the output, you can simply plug them directly into to relay's load circuit harness connector and short the circuit thus causing the loaded circuit to activate.
5VRP-AVIOD	5 Volt Reference Provider	This tool allows the technician to have a regulated 5-volt power supply on hand to bench test computer controlled components.

WEB SERVICES & INTEGRATIONS

AVI offers a host of web services and solutions. From branded pages to white-label LMS platforms, AVI can mold a solution to fit your needs. If you are looking to connect your platform to the Group Training Academy or AVI On Demand we can connect to platforms such as Canvas and Blackboard.

Integrating Your Content Into The Group Training Academy and AVI

If you are looking to get your content in front of more learners, we might be interested in a partnership where your content can be integrated into the Group Training Academy or AVI On Demand. There are several methods we use to make this happen including:

- We can rebuild your content within our native LMS
- We can connect through a Single Sign On so that learners will head to your platform
- *Coming soon: We will be able to accept SCORM packets!*

Integrating AVI Content Onto Your Platform

AVI has a robust collection of courses and course content that can be integrated with your platform through several channels. Whether you want ASE Test Prep or premium releases, AVI can customize an experience for your users. Connectivity and integrations can be achieved through methods including:

- SCORM 1.2 or 2004 packets
- API Integration
- LTI Integration

White-Label Platforms

AVI hosts several white-label platforms for our clients. We offer a full turn-key solution to a branded experience for your team. The same features and functions available on AVI On Demand and The Group Training Academy are included in our white-label platforms. In addition to content, AVI will also maintain and manage the website saving you the headache of modern internet challenges.

Portal Pages

If you want users to come from your website to AVI On Demand for training we can make the experience look a little more like your brand by creating a branded portal. Your logo would be front and center and content you pick would be displayed directly on the page giving your learners a one-stop-shop experience. Just like any other shop or organizational unit, you will be able to assign, track, and generate reports on the course completion of your users.

ADDITIONAL CONTENT

There is a great deal more content on AVI On Demand and the Group Training Academy than just ASE Test Prep and premium courses. Thanks to a variety of partnerships and collaborations learners can find well over 1000 hours of content on our platforms.

Manufacturer Videos

AVI and The Group Training Academy hosts hundreds of videos featuring manufacturer content from how to install their product to how to sell it in your stores or bays. Some of these videos are part of packages for purchase and many more are free to view.

Product Knowledge Posts

Much like the manufacturer videos, Product Knowledge Posts deal with teaching your techs, service advisors, and counter men about products. Many of these come from manufacturers and may help give your team the edge when it comes to the many choices available to the aftermarket auto shop.

Tech Tips

Whenever AVI creates a premium course, one or more tech tips are pulled out of the content and are made available for free. Often times these tech tips are useful knowledge and also inform a learner about the overall content of the premium course.

Sales and Marketing Training

Some of the training available on our platforms focuses on the oft overlooked sales and marketing techniques and tactics. These can be extremely valuable for your service advisors and parts professionals. An automotive genius may be able to provide you the best way to fix a problem but may not be the best at selling the customer the parts and services that make your shop profitable.

Shop Owner and Manager Training

Techs and parts pros aren't the only ones to benefit from expert-led training. Need help figuring out how to hire the best or help getting your shop profitable, look no further than the many offerings available directed at shop owners and managers.

If we were to put all of our courses and content into this catalog it would be enormous. There are thousands and thousands of videos, posts, tips, courses, manuals, and tools & equipment on AVI On Demand. Check out the website for the full experience.
