The first of two photographs which Cedric Allingham took at approximately 3.45 p.m., on 18th February, 1954 near Lossiemouth, as the Saucer was descending. The landing gear is clearly discernible to the lower left of the picture

Sketch of Saucer seen over East Malvern, Victoria, Australia, on May 31, 1954. Observers were David Reese and five friends. Mr. Reese, who made the sketch, says: "I could distinctly see inside it, dark shapes like busts." (Enlargement at top of sketch.)

This unretouched photo of an unknown black object leaving trail behind it, was taken near Cirenoble, in southeastern France, on September 24, 1954.

telephoto picture taken
September 9, 1954, at
on, New Zealand, when
e disks were seen hov-
g in close formation at
at 450 feet altitude. They
e visible from five to
n minutes.

These six UFO's were seen and drawn by Astronomer Barnard, October 14, 1882, and were only 6° from the head of the great comet of 1882. They were accompanied by a spindle-shaped object, looking like a "mother ship" only a few degrees away. This comet had a tail which preceded it, and a complicated head which contained moving parts. Schmidt, at Athens, saw a number of these nebulous UFO's move away from the comet into space.

Flying Saucer or unidentified light in the sky photographed by Mr. K. M. Gibbons in September, 1954, over Nelson, New Zealand. Mr. Gibbons says that he saw three such

Photo: Black Star.

This amazing photograph shows three space craft hovering over the Armco Steel Corporation blast furnace plant at Hamilton, Ohio, U.S.A., in 1950. The staff camera-man, Mr. B. Ruoff, had merely set up his camera for a night view of the furnaces, when these three objects appeared overhead. No known terrestrial aéroform in the least resembles them.

Photo by courtesy of the Armco Steel Corporation.

29. The red-luminous sphere seen from the Bourget control tower.

2. A weather balloon-- Their white color and spherical shape account for

3. Unusual atmospheric phenomena: a halo around the sun, seen over Paris. The black spot in the foreground is the top of the Eiffel Tower.

19

A dark, grainy photograph of a night sky. In the upper left, a bright sun is surrounded by a faint, circular halo. In the lower left foreground, a dark, irregular shape represents the top of the Eiffel Tower. The rest of the image is a dark sky filled with numerous small, bright stars or distant galaxies. The overall quality is poor, with significant noise and grain.

9. The Bocaranga sighting.

35

Taormina, Sicily: Four Sicilians gaze skyward at two Unidentified Flying Objects.

This mysterious object was photographed in the summer of 1953, over Bad Hersfeld, western Germany. The top picture shows the lower disk enlarged about 35 times. As will be noticed, it appears to have a cupola near the center and another protuberance near the right rim.

Officially "unidentified objects", denoted by black circles, tracked on the radarscope at Washington D.C. Airport on

A week later, on 4th March, 1951, *The Sunday Dispatch* referred again to this sighting and reproduced a sketch of the mysterious object, as under:

The newspaper made the following comments:

Flying in a cloudless sky over Mount Kilimanjaro, Tanganyika, Captain Jack Bicknell, pilot of a passenger plane bound for Mombasa, saw through binoculars "a metallic, bullet-shaped object which must have been more than 200 feet long". *The Sunday Dispatch* last week gave a detailed report of this Flying Saucer sighting, the most authentic so far recorded.

When he brought the plane down, Captain Bicknell drew a sketch of what he had seen.

The diagram above was prepared from Captain Bicknell's sketch and shows the "large object attached to the rear".

This is one of the cigar-shaped Flying Saucers, said to be hostile. Here it is shown releasing two satellite discs. Photographed by Miss Belle Malles, over Hawthorne, Calif., U.S.A.
